

Was blüht, summt und flattert in der Wiese an den Kienbergterrassen?

	Pflanze		Mai	Juni	Juli	August	Sep	Hummeln	Bienen	Wespen	Falter	Andere
	Rote Taubnessel	<i>Lamium purpureum</i>										
	Rauhaar-Wicke	<i>Vicia hirsuta</i>										
	Barbara-Kresse	<i>Barbarea vulgaris</i>										
	Saat-Wicke	<i>Vicia sativa</i>										
	Fettwiesen-Margerite	<i>Leucanthemum ircutianum</i>										
	Gewöhnlicher Löwenzahn	<i>Taraxacum officinale</i>										
	Graukresse	<i>Berteroa incana</i>										
	Gelbe Reseda	<i>Reseda lutea</i>										
	Kartäuser-Nelke	<i>Dianthus carthusianorum</i>										
	Reiherschnabel	<i>Erodium cicutarium</i>										
	Wiesen-Flockenblume (Unterart 1)	<i>Centaurea jacea</i>										
	Weißes Labkraut	<i>Galium album</i>										
	Weiße Nachtnelke	<i>Silene latifolia</i>										
	Acker-Witwenblume	<i>Knautia arvensis</i>										
	Große Brennessel	<i>Urtica dioica</i>										
	Spitzwegerich	<i>Plantago lanceolata</i>										
	Kornblume	<i>Centaurea cyanus</i>										
	Saat-Lein	<i>Linum usitatissimum</i>										
	Wiesen-Salbei	<i>Salvia pratensis</i>										
	Steppen-Salbei	<i>Salvia nemorosa</i>										
	Klatsch-Mohn	<i>Papaver rhoeas</i>										
	Saat-Esparsette	<i>Onobrychis viciifolia</i>										
	Bastard-Luzerne	<i>Medicago varia</i>										
	Gewöhnliches Leimkraut	<i>Silene vulgaris</i>										
	Gemeine Schafgarbe	<i>Achillea millefolia</i>										
	Echtes Labkraut	<i>Galium verum</i>										
	Tüpfel-Hartheu	<i>Hypericum perforatum</i>										
	Gewöhnlicher Natternkopf	<i>Echium vulgare</i>										
	Zottel-Wicke	<i>Vicia villosa</i>										

	Pflanze		Mai	Juni	Juli	August	Sep	Hummeln	Bienen	Wespen	Falter	Andere
	Silber-Fingerkraut	<i>Potentilla argentea</i>										
	Lösel's Rauke	<i>Sisymbrium loeselii</i>										
	Gemeiner Hornklee	<i>Lotus corniculatus</i>										
	Kriechendes Fingerkraut	<i>Potentilla reptans</i>										
	Stumpflättriger Ampfer	<i>Rumex obtusifolius</i>										
	Krauser Ampfer	<i>Rumex crispus</i>										
	Moschus-Malve	<i>Malva moschata</i>										
	Gewöhnlicher Rainfarn	<i>Tanacetum vulgare</i>										
	Wegwarte	<i>Cichorium intybus</i>										
	Wilde Rauke	<i>Diplotaxis tenuifolia</i>										
	Brombeere	<i>Rubus spec.</i>										
	Gewöhnlicher Dost	<i>Origanum vulgare</i>										
	Wilde Möhre	<i>Daucus carota</i>										
	Acker-Kratzdistel	<i>Cirsium arvense</i>										
	Wege-Distel	<i>Carduus acanthoides</i>										
	Wiesen-Flockenblume <small>(Unterart 2)</small>	<i>Centaurea jacea</i>										
	Gemeiner Beifuß	<i>Artemisa vulgaris</i>										
	Hasen-Klee	<i>Trifolium arvense</i>										
	Kanadische Goldrute	<i>Solidago canadensis</i>										
	Gemeines Leinkraut	<i>Linaria vulgaris</i>										
	Kanadisches Berufkraut	<i>Erigeron canadensis</i>										
	Gewöhnliches Bitterkraut	<i>Picris hieracioides</i>										

Von 01. Mai bis 15. September 2021 wurde die Wiese zweimal monatlich aufgesucht. Blühende Pflanzen wurden in der Tabelle erfasst, Insekten zur Bestimmung fotografiert. Die gelben Balken in den Monatsspalten geben Blühbeginn und -ende sowie die geschätzte Häufigkeit in drei Stufen an. Die blau markierten Arten sind die Pflanzenarten, die 2016 für die IGA ausgesät wurden. Außer Feldbeifuß und Wiesenknöpfchen konnten alle Arten aus 2016 auf der Wiese nachgewiesen werden.
